

Bicycle Paper Craft

What you'll need...

To construct your paper bicycle toy you will need card-stock, a printer, scissors, brads, and things to decorate your bike with like markers, glitter glue, stickers, and ribbon.

Here's how...

1. Carefully fold the page in half along the center dotted line
2. Cut out the frame including the small curved line for the front of the seat
3. Fold the top of the frame to one side along the dotted line (see arrow in second image)
4. Fold the other way then invert the "V" shaped fold as shown in image three (this is the tricky part)
5. Press holes into the frame and wheels, sandwich wheels in frame, then fasten with brads
6. Fold up handle bars along dotted lines then decorate; I added curly ribbon!
